Brightleaf Solutions Successfully Clears Surveillance Audit for ISO 27001:2013 and 9001:2015

Recognized for continued compliance of Information Security and Quality Management Systems – Requirements

Brookline, MA – Brightleaf Solutions, Inc., a leading provider of contract abstraction and analytics solutions for tracking contract data, has successfully cleared the surveillance audit for continued compliance of ISO (International Organization for Standardization) 27001:2013 and 9001:2015 standards by TUV Nord. Having surpassed the stringent criteria of these standards, Brightleaf affirms its commitment to the security of its clients' sensitive information, and to deliver peak quality service by driving continuous improvements to its products, services, and internal processes.

"Brightleaf deals with the most sensitive information of its clients - their contracts, on which they run their business. By achieving the ISO 27001:2013 certification, Brightleaf remains an industry leader for its' unwavering dedication to the security and safety of all client contractual information that is delivered as extracted data to be migrated into a Contract Lifecycle Management System. With the continuity of this certification, Brightleaf's technology, people and processes have been vetted against rigid quality standards outlined by the ISO", states Samir Bhatia, CEO of Brightleaf.

The ISO 27001:2013 Standard is a process-based approach established and updated by the International Organization for Standardization (ISO), the world's largest developer of international standards. The ISO 27001:2013 standard specifies the requirements for establishing, implementing, maintaining, and continually improving an information security management system (ISMS) within an organization. By implementing and following the necessary steps to comply with this standard, organizations can identify, control, and eliminate security risks; ultimately certifying that security practices are adopted throughout their organization.

"Brightleaf delivers perfect Six-Sigma output of data points extracted from Clients' contracts. The renewal of the ISO 9001:2015 quality certification, Brightleaf has shown its commitment to achieve the quality standards that its customers' demand and have grown to expect", continued Mr. Bhatia.

The world's most popular quality management system standard, ISO 9001:2015 helps businesses prove their ability to consistently provide products and services that meet customer applicable statutory and regulatory requirements. Obtained through extensive external audits performed by TUV Nord, a world class ISO certification organization and an independent accredited registrar company, the certification aims to enhance customer satisfaction through the effective application of a company's system, including processes for improving the system and assuring compliance with various regulations.

ABOUT BRIGHTLEAF SOLUTIONS, INC.

Brightleaf provides a technology powered service to extract information using our own proprietary semantic intelligence/natural language processing technology; our own team of lawyers to check the output; and our own Six-Sigma process to deliver end-to-end, highly accurate, extracted data.

The data can be virtually anything, and it is customized for each and any type of contract. All meta-data, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software. This extracted data is checked by our team of lawyers, and provided in a format for easy upload into any system, such as a Contract Lifecycle Management System (CLM), for tracking and reporting ([download Strategy Brief](#)).

This allows you to: leverage the knowledge in your existing contracts; report on the extracted data; comply with current and upcoming regulations; even recover hidden revenue (e.g. by policing penalty clauses in your supplier agreements).

Brightleaf is recognized in many publications and has also won multiple awards, including, Best Contract Management Solutions Provider by CIOReview for 2017 (<http://www.brightleaf.com/awards-recognitions/>).
