Brightleaf Overview

Legacy Contract Data Migration/ Extraction Experts
Extract Perfection!

About Us

We are a Boston-based, minority-owned, legal technology and services company with operational centers in India. Our technology-powered contract data extraction and mining services are delivered to business customers worldwide.

Our Vision

Our legacy contract migration/data extraction services open new doors for companies to manage risk, ensure regulatory compliance, recover revenue, avoid penalties, and meet customer obligations. Working in partnership with CLM system vendors, we ensure all the important, historical data locked away in your legacy contracts is abstracted, verified, and uploaded into your CLM system at near 100% accuracy.

What We do

Brightleaf provides a technology-powered service to extract information from your contracts using our own proprietary semantic intelligence/natural language processing technology, our own team of lawyers to check the output, and our own Six-Sigma process to deliver highly accurate extracted data from your contracts.

Your legacy contractual documents along with this extracted metadata can be migrated into a Contract Lifecycle Management (CLM) system for tracking and reporting. This greatly enhances the value of your investment in the system. The data can be virtually anything, and it is customized for each of your types of contracts. All metadata, terms and conditions, legal provisions, and even all obligations (which are usually scattered throughout your contracts) are extracted by our software.

What we offer

Legacy Contract Data Extraction Service

AI Data Extraction Software

AI Third Party Paper Data Extraction

Our Technology

Brightleaf's semantic intelligence engine/natural language processing technology is a proprietary software platform for analyzing and abstracting all commercial terms, legal provisions, and obligations from any text-based legal document. The underlying architecture understands linguistics, along with broad and multi-layered grammatical constructs, allowing it to parse complex legal language across any number of contracts and companion documents such as amendments, addendums, side letters, etc. The highly-detailed results are interpreted and refined to build a consistent, structured dataset, then put through a Six Sigma quality control process.

What our clients say about us

"My project team has been very impressed with Brightleaf's work!! Timeliness, accuracy, responsiveness, we've really been impressed with the output from your team. We appreciate the time and hard work you and your folks have put forward on our project!"

"Brightleaf was very flexible and adaptable. Communication was exceptionally good"

"Brightleaf far exceeded our expectations and delivered Six Sigma results on millions of data points. Their proprietary software did most of the work every efficiently. Their team of lawyers ensured the accuracy of the results. These guys rock!"
